

amino5

ACBS GMS PBS

Description

Food for special medical purposes.

MSUD amino5 is a powdered leucine, isoleucine and valine free amino acid supplement.

Indications

For the dietary management of Maple Syrup Urine Disease (MSUD) from birth.

Dosage and Administration

To be determined by the clinician or dietitian and is dependent on the age, body weight and medical condition of the patient.

Preparation Guidelines

To be determined by the clinician or dietitian. Can be used in the dietary management of MSUD in a variety of ways:

- Mixed in with protein substitute
- Added to modular feeds.
- Incorporated into other permitted food or drink.

The product should be freshly prepared and consumed immediately; if this is not possible, then all prepared product must be tightly covered and consumed within 4 hours if kept at room temperature, or within 24 hours if refrigerated. Shake before use.

For bottle fed infants:

1. Sterilise feeding equipment according to manufacturer's instructions.
 2. Follow the feed preparation instructions provided by your dietitian or clinician.
- Use immediately and discard any remaining product after 1 hour.
Do not reheat once feeding has started.

MSUD amino5 (6g) = 5g PE

IMPORTANT NOTICE

Must only be consumed by individuals with MSUD.

Suitable from birth.

Children under 12 months: when made into solution or added to infant formula, use immediately and discard any remaining within 1 hour.

Diet must be supplemented with natural protein, water and other nutrients in prescribed quantities to supply leucine, isoleucine, valine, fluid and general nutritional requirements.

Not suitable for use as a sole source of nutrition.

Use under medical supervision.

For enteral use only.
