Description

Food for special medical purposes.

PKU sphere® is a powdered, low phenylalanine protein substitute containing a balanced mix of glycomacropeptide (GMP) isolate, essential and non-essential amino acids, carbohydrate, fat, vitamins, minerals and docosahexaenoic acid (DHA). With sugar and sweetener.

Indications

PKU sphere is for the dietary management of phenylketonuria (PKU) from 4 years of age onwards.

Recommended Intake and Administration

To be determined by the clinician or dietitian and is dependent on the age, body weight and medical condition of the patient.

PKU sphere15 (27g sachet) = 15g PE
1 sachet = 28mg phenylalanine

PKU sphere20 (35g sachet) = 20g PE
1 sachet = 36mg phenylalanine

Preparation Guidelines

1. Measure cold water into a cup with a lid (100ml for PKU sphere15, 120ml for PKU sphere20).
2. Add 1 sachet of PKU sphere.
3. Secure lid and shake until the powder is fully dissolved.
4. PKU sphere is now ready to use.

The product should be freshly prepared and consumed immediately. If this is not possible then all prepared product must be tightly covered and consumed within 4 hours if kept at room temperature, or within 24 hours if refrigerated. If separation occurs, re-shake before use.

IMPORTANT NOTICE

PKU sphere must be used under medical supervision.

Not suitable for use as a sole source of nutrition.

PKU sphere is suitable from 4 years of age onwards.

PKU sphere must only be consumed by people with PKU. Protein in prescribed amounts must be supplemented to completely meet phenylalanine requirements.

Ensure adequate intake of fluid and other nutrients to meet general nutritional requirements.

Protein substitutes based on GMP are a source of phenylalanine.

For enteral use only.
